

Scuba-Quest **Burma Dive Sites** Scuba-Quest

Little Torres Islands

This site is 3 boat hours from Black Rock.

The island, oriented North-South, give a excellent sheltered position for the night. It offer a very shattered shore and sharp ridges.

Distance from Phuket: 230 NM
Distance from Victoria Point: 110 NM Diving

An fabulous night dive-site close to the shore among boulders will show you a festival of colours. Hard and soft coral absolutely intact.

Small life and the paradise for shell (cowrie, coneshell). The Crustacean is abundant like also squid and cuttlefish.
The day deep dive leads you to "Seafan forest", a kind of touch-and-go to a 40 meter depth sea fan area. Living among them are lionfish, moorish idol, wrasse.

A cowrie dive site, more precisely with the egg cowrie or "Ovula ovum", covered with a black mantel.

Bottom dweller rays like bowmouth guitarfish have been occasionally spotted.

Visibility:	fair to excellent
Currents:	moderate to strong
Corals:	hard and soft corals , sea fans
Marine life :	costal marine life
Highlights:	Seafans, Bowmouth guitarfish
